

Enterprises approved for funding under the Enterprise Based Productivity Places Program. Enterprises by Industry Skills Council

A total of \$40m has been allocated through the first round of the program which will deliver almost 11,000 new training places for high demand skills for existing workers. This will be followed by a limited second round which will deliver an estimated further 2700 training places before July this year. Training will commence this year and be delivered over the subsequent three years.

The training is jointly funded by enterprises and the Government. The Government's contribution depends on the size of the business with smaller businesses receiving a larger amount per qualification than larger businesses.

Under the EBPPP the national Industry Skills Council network will collaborate with a number of small, medium and large enterprises, national professional associations and industry bodies. The Industry Skills Councils will coordinate the delivery of training.

Industry Skills Councils have specialised knowledge that positions them well to work with enterprises and support them in developing proposals for funding.
